

EquiSkill

Bridge the skill gap. Land your dream career. Powered by AI.

Presented By:

Harish Mahendra Pawar

COEP Technological University

Agentic AI Intern (Lenovo Leap)

What is EquiSkill?

An end-to-end AI platform that analyzes your skills, identifies gaps, and builds a personalized career roadmap — making every student job-ready.

Primary Objective

Empower students & job seekers with AI-driven skill analysis and personalized career guidance tailored to real market demands.

Core Problem We Solve

Students graduate without knowing which skills employers need. EquiSkill bridges the knowing-doing gap with data-driven insights.

Measurable Outcome

Reduce time-to-hire by 40% through targeted skill development, smart job matching, and resume optimization powered by LLMs.

The Employability Crisis

65%

Graduates feel unprepared for jobs

3.4M

Tech jobs unfilled globally

18mo

Average skill-to-job mismatch cycle

85%

Resumes rejected by ATS systems

No Personalized Guidance

Generic career portals don't understand individual skill profiles or learning pace.

Resume Blind Spots

Students don't know what keywords, skills, or experiences employers are looking for.

Information Overload

Too many learning platforms with no clear path — students waste months on irrelevant content.

EquiSkill Solves It All

A unified AI platform connecting skill gaps to career success through an intelligent, personalized pipeline.

Value Proposition

One platform replaces 5+ tools — career portals, resume builders, learning sites, job boards, and AI assistants — all powered by a single intelligence layer.

Competitive Edge

Unlike LinkedIn or Coursera, EquiSkill adapts in real-time to your skill profile and current job market trends using live AI inference.

Everything You Need to Succeed

AI Resume Analyzer

Deep NLP analysis of your resume against job descriptions with ATS-optimization tips.

Skill Gap Analysis

Compares your current skills to role requirements and surfaces precise gaps to close.

Learning Roadmap

Auto-generated week-by-week study plan with curated resources for each skill gap.

Smart Job Matching

AI-powered job recommendations ranked by your profile fit score and growth potential.

AI Career Chatbot

24/7 conversational assistant for career advice, interview prep, and guidance.

Analytics Dashboard

Track applications, skill progress, profile views, and career readiness score over time.

Built with Modern Tech

A robust, scalable, production-ready architecture leveraging industry-leading tools and AI APIs.

Scalable Architecture

Microservices-ready, containerized architecture ensuring high availability, fault tolerance, and horizontal scalability.

Design Principles

- ✓ Separation of concerns
- ✓ Stateless REST API
- ✓ Async processing pipeline
- ✓ JWT-based security

How It Works

A seamless end-to-end experience from signup to career success in just a few steps.

Experience

[EDIT] Job Title	[EDIT] Dates
[EDIT] Company Name	[EDIT] Location
• [EDIT] Achieved X by doing Y, resulting in Z.	
• [EDIT] Developed and implemented A, leading to B improvement.	

Projects

- Intelligent Document Question-Answering System (RAG & LLMs) | *Python, Streamlit, FAISS, Llama3*, [EDIT]2023
- Developed an advanced Retrieval Augmented Generation (RAG) system for intelligent document querying, leveraging Llama3 (via Ollama) and FAISS vector search over PDF documents.
 - Engineered a full pipeline including PDF chunking, semantic search, and embedding generation using Sentence Transformers for enhanced contextual understanding.
 - Designed and implemented an interactive Streamlit web application for real-time document querying, providing an intuitive user experience.
- Surface Crack Detection using CNN | *Python, TensorFlow, Keras, OpenCV* [EDIT]2023
- Built a robust Convolutional Neural Network (CNN)-based image classifier for accurate detection of cracks on industrial surfaces.
 - Implemented comprehensive image preprocessing techniques and conducted binary classification, achieving high detection accuracy.
 - Trained and evaluated the model using TensorFlow/Keras, with detailed performance visualization and analysis.
- Text Sentiment Analysis using RNN/LSTM | *Python, TensorFlow, Keras, NLTK* [EDIT]2023
- Developed an LSTM (Long Short-Term Memory)-based sentiment classifier for categorizing text into positive, negative, or neutral sentiments.
 - Utilized Word2Vec/GloVe embeddings for rich semantic representation and applied dropout regularization to prevent overfitting.
 - Trained the model with Adam optimizer and cross-entropy loss, demonstrating proficiency in advanced NLP and sequence modeling.
- Real-Time Threat Intelligence & URL Classification Engine | *Python, Scikit-learn, Pandas, NumPy* [EDIT]2023
- Engineered a real-time URL threat classifier using a 6-model soft-voting ensemble (Random Forest, Logistic Regression, Gradient Boosting) to detect malicious/phishing URLs with confidence scoring.

What Makes Us Different

AI-FIRST

Gemini-Powered Intelligence

Real-time LLM inference for resume analysis and career recommendations using Google's latest Gemini models.

NOVEL

Precision Skill Matching

Multi-dimensional skill vectors mapped against live job market data — not just keyword matching.

UNIQUE

End-to-End Automation

From resume upload to job application — the entire workflow is automated with AI at every step.

SCALABLE

Microservices Architecture

Docker-containerized services designed for horizontal scaling to handle millions of users.

SMART

Adaptive Learning Plans

Roadmaps that update dynamically as job market trends change and as users make progress.

DUAL-SIDED

Recruiter Intelligence

Recruiters can discover candidates ranked by AI fit score — a first-of-its-kind matchmaking engine.

The Road Ahead

Short-Term

0 – 6 Months

- LinkedIn OAuth integration
- Interview prep simulator with AI feedback
- Advanced resume keyword optimization
- Mobile-responsive PWA
- Batch resume processing for recruiters

Mid-Term

6 – 18 Months

- Real-time job board API integrations
- AI mock interview with NLP scoring
- Multilingual support (10+ languages)
- University & bootcamp partnerships
- Employer portal & talent pipeline

Long-Term Vision

18+ Months

- National skill ecosystem platform
- Credential verification via blockchain
- Predictive salary & growth modeling
- Government & enterprise partnerships
- Global EdTech marketplace integration

Real-World Impact

For Students & Job Seekers

40% faster job placement, clear skill roadmaps, higher resume pass rates through ATS filters, and personalized 1-to-1 AI guidance previously available only to premium career coaches.

For Organizations & Recruiters

60% reduction in screening time, higher quality candidates, AI-ranked applicant pools, and data-driven hiring decisions based on verified skill profiles.

For Society

Democratize access to career guidance for students from tier-2 and tier-3 cities who can't afford premium coaching, reducing employability inequality nationwide.

For the Industry

Bridge the \$8.5T talent shortage gap, accelerate industry adoption of AI in HR processes, and create a new standard for data-driven career intelligence platforms.

The Future of Career Intelligence Starts Here

EquiSkill isn't just a platform — it's a movement to make every student job-ready with the power of AI.

AI-First Platform

Gemini-powered intelligence at every touchpoint of the career journey

Real Problem, Real Impact

Solving a \$8.5T talent gap with precision skill matching and roadmaps

Ready to Scale

Microservices architecture built for millions of users from day one

"Empowering every student to reach their full career potential, one skill at a time."
